

REALDYME Business Partner Testimonial

Realdyme representative company in Taiwan, Asia Elan Corp., has made a market study. It appeared that without a local farm trial it would not be possible to market Realdyme in Taiwan.

Then we started a relationship with Dr Yen Oungda , Pig Research Institute, in order to define the right way to organize such trial. Dr Yen was impressed by Realdyme performance results so he decided to recommend CCPC, Paul Chen, to us.

We are a family business and value the long term and strong ethic. We found a perfect fit with CCPC where long term and hard working is the core of its DNA. In the last 25 years we have faced ups and downs but we always were confident that CCPC would fully respect its commitment.

We regard CCPC as a highly reliable and ethical partners. The mutual confidence build during all these years is the foundation of our full support to CCPC.

The relation build with CCPC is unique and has passed many difficult events. We have strong ties starting with a visit of CCPC Customer in France in 1995. It is still alive and strong today.

I make the wish of further development for the next 25 years.
